"Every prompt in this guide is copy-paste ready — no prompt engineering background needed. Just swap the [bracketed] parts and go."

HOW TO USE THIS GUIDE

Copy any prompt below, paste it into your AI tool of choice (ChatGPT, Claude, Gemini, or similar), and customize the bracketed parts [like this] to fit your specific need. No prompt engineering experience required.

1. Writing & Content Creation

Blog Post Outline

```
Write a detailed outline for a blog post about [topic]. Include an engaging title, 5-7 subheadings, and a one-sentence summary of what each section should cover. The target audience is [audience], and the tone should be [tone, e.g. casual/professional].
```

Improve My Writing

```
Rewrite the following text to be clearer and more engaging, without changing its meaning. Keep the same length. Explain briefly what you changed and why:
[paste your text]
```

Email Draft

```
Write a [formal/friendly/persuasive] email to [recipient] about [purpose]. Keep it under 150 words. Include a clear call to action at the end.
```

Product Description

```
Write a compelling product description for [product name], highlighting these key benefits: [list benefits]. Target audience: [audience]. Length: 80-100 words.
```

2. Research & Learning

Explain Like I'm New to This

```
Explain [topic] as if I have no prior background in it. Use a simple analogy, avoid jargon, and keep it under 200 words. Then give me 3 follow-up questions I should ask to go deeper.
```

Compare Two Options

```
Compare [Option A] and [Option B] across these factors: [list factors, e.g. price, ease of use, features]. Present the comparison as a table, then give a one-paragraph recommendation based on [your priority, e.g. budget/speed/quality].
```

Summarize a Long Document

```
Summarize the following text in 3 bullet points, capturing only the most important information. Then write a one-sentence takeaway:
[paste text]
```

3. Marketing & Social Media

Social Media Caption Pack

```
Write 5 different social media captions for a post about [topic/product]. Vary the tone across the 5 (one funny, one professional, one urgent, one storytelling, one question-based). Include relevant hashtag suggestions for each.
```

Ad Copy Variations

```
Write 3 short ad headlines (under 10 words each) for [product/service], each focusing on a different angle: price, quality, and speed/convenience.
```

4. Coding & Technical

Explain This Code

```
Explain what this code does, line by line, in plain English. Then suggest one way it could be improved:
[paste code]
```

Debug This

```
This code is producing [error/unexpected behavior]. Here's the code and the error message. Identify the likely cause and suggest a fix:
[paste code and error]
```

Write a Function

```
Write a [language] function that [does X]. Include comments explaining each step, and one example of how to call it.
```

5. Business & Productivity

Meeting Agenda

```
Create a 30-minute meeting agenda for discussing [topic]. Include time allocations for each section and 2-3 discussion questions to keep the conversation focused.
```

Decision-Making Framework

```
I'm deciding between [Option A] and [Option B] for [context]. Give me a pros/cons list for each, then suggest 3 questions I should answer before deciding.
```

6. Image & Visual Prompts

Product Mockup

```
[Product] on a clean [color] background, soft studio lighting, minimalist style, professional product photography, high detail, centered composition.
```

Social Media Graphic

```
Bold, eye-catching graphic for [topic], [color scheme] palette, modern flat design style, large readable text space at the top, social-media-ready composition, 1080x1080.
```

Brand Mascot / Icon

```
Simple, friendly [character/object] mascot logo, [color] gradient, rounded shapes, minimal detail, transparent background, suitable for app icon use.
```

Bonus: 5 Prompt-Writing Tips

1. **Be specific about format** — "as a table," "in 3 bullet points," "under 100 words" gets you output you can actually use immediately.

2. **Give it a role** — "Act as a [marketing expert/copywriter/teacher]" often improves the tone and depth of the response.

3. **Ask for options, not one answer** — "Give me 3 variations" beats asking for a single result you might not like.

4. **Iterate, don't restart** — If the output isn't right, say "make it shorter" or "more casual" instead of rewriting the whole prompt.

5. **Provide examples when possible** — Pasting a sample of the style/format you want dramatically improves results.
